Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a powered hammer, classified in class 173, subclass 48.
 - II. Claims 12-14, drawn to a piston for a hammering mechanism, classified in class 173, subclass 104.
 - III. Claim 15, drawn to a method of assembling a piston and a trunnion arrangement sub-assembly, classified in class 173, subclass 1.

The inventions are distinct, each from the other because:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as including a wobble drive arrangement drivingly connected to the piston. See MPEP § 806.05(d).
3. Inventions III and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another materially different apparatus not having the specific features of a wobble drive arrangement drivingly connected to the piston.
4. Inventions III and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as

Art Unit: 3721

claimed can be practiced by another materially different apparatus not having the specific features an arcuate bearing surface shaped to substantially conform to the washer.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
